## Cloud Based Artificial Intelligence

**Dubai - May 01, 2018:** Organisations face a growing number of increasingly complex and ever-evolving threats – and the most dangerous threats are often the hardest to discover. Take the insider threat or stolen credentials, for example. We have seen many high-profile attacks stem from the unauthorised use of legitimate user credentials, which can be extremely difficult to expose.

The perimeter-based model of yesterday is insufficient for the mammoth task of protecting a company's assets. Instead, we are starting to see a shift towards automation and the application of cloud-based artificial intelligence, which is fast becoming critical in the fight against modern cyber threats.

### About LogRhythm:

LogRhythm, a leader in security intelligence and analytics, empowers organizations around the globe to rapidly detect, respond to and neutralize damaging cyber threats. The company's patented award-winning threat lifecycle management platform uniquely unifies next-generation SIEM, log management, network and endpoint monitoring, user entity and behavior analytics (UEBA), security automation and orchestration and advanced security analytics. In addition to protecting customers from the risks associated with cyber threats, LogRhythm provides unparalleled compliance automation and assurance, and enhanced IT intelligence.

LogRhythm is consistently recognized as a market leader. The company has been positioned as a Leader in Gartner's SIEM Magic Quadrant report for five consecutive years, named a 'Champion' in Info-Tech Research Group's 2014-15 SIEM Vendor Landscape report, received SC Labs 'Recommended' 5-Star rating for SIEM and UTM for 2016 and earned Frost & Sullivan's 2015 Global Security Information and Event Management (SIEM) Enabling Technology Leadership Award.

LogRhythm is headquartered in Boulder, Colorado, with operations throughout North and South America, Europe and the Asia Pacific region.
