LogRhythm Named a Leader in 2017 Gartner Magic Quadrant for Security Information and Event Management

LogRhythm once again recognized for completeness of vision and ability to execute

Dubai - Dec 09, 2017: <p>LogRhythm, The Security Intelligence Company, today announced that it has, once again, been positioned as a Leader by Gartner, Inc. in the 2017 "Magic Quadrant for Security Information and Event Management"* research report, for its Threat Lifecycle Management Platform.</p>

<p>"We feel it's an honor to be consistently recognized as a Leader in this Gartner Magic Quadrant," said LogRhythm CTO and Senior Vice President of Research & Development, Chris Petersen. "As data breaches continue to come fast and furious, it's critical that companies rapidly detect, neutralize and recover from security threats. We believe this research report speaks volumes about LogRhythm's leadership in the market and our ability to meet the challenges of today's continually evolving threat landscape for enterprise Security Operations Centers (SOCs) across the globe."</p>

<p>According to Gartner, "the SIEM Leaders quadrant is composed of vendors that provide products that are a strong functional match to general market requirements, have been the most successful in building an installed base and revenue stream within the SIEM market, and have a relatively high viability rating (due to SIEM revenue or SIEM revenue in combination with revenue from other sources). In addition to providing technology that is a good match to current customer requirements, Leaders also show evidence of superior vision and execution for emerging and anticipated requirements. They typically have relatively high market share and/or strong revenue growth, and have demonstrated positive customer feedback for effective SIEM capabilities and related service and support."</p>

<p>In addition to SIEM, LogRhythm's Threat Lifecycle Management^{TM} (TLM) Platform delivers solutions for user and entity behavior analytics (UEBA), network traffic and behavior analytics (NTBA), enterprise log management, network and endpoint monitoring, and security automation and orchestration (SAO). These solutions comprise the principal workflow of the next-generation security operations center, seamlessly integrating people and processes across the security organization and enabling security teams to detect and respond to threats quickly and with great precision. LogRhythm's customers include some of the largest enterprises and government agencies across the world.</p>

About LogRhythm:
LogRhythm, a leader in security intelligence and analytics, empowers organizations around the globe to rapidly detect, respond to and neutralize damaging cyber threats. The company's patented award-winning threat lifecycle management platform uniquely unifies next-generation SIEM, log management, network and endpoint monitoring, user entity and behavior analytics (UEBA), security automation and orchestration and advanced security analytics. In addition to protecting customers from the risks associated with cyber threats, LogRhythm provides unparalleled compliance automation and assurance, and enhanced IT intelligence.

LogRhythm is consistently recognized as a market leader. The company has been positioned as a Leader in Gartner's SIEM Magic Quadrant report for five consecutive years, named a 'Champion' in Info-Tech Research Group's 2014-15 SIEM Vendor Landscape report, received SC Labs 'Recommended' 5-Star rating for SIEM and UTM for 2016 and earned Frost & Sullivan's 2015 Global Security Information and Event Management (SIEM) Enabling Technology Leadership Award.

LogRhythm is headquartered in Boulder, Colorado, with operations throughout North and South America, Europe and the Asia Pacific region.
