## Etisalat Goes to Market as SonicWall SecureFirst Partner

**Dubai - Jan 31, 2018:** <p>The collaboration between <a href="http://www.tcfnewswire.net/en/company/sonicwall">SonicWall</a> and Etisalat Digital is primarily focused on delivering end-to-end digital security solutions to small- and medium-sized businesses (SMB) throughout the UAE. As a SonicWall SecureFirst partner, Etisalat Digital can deliver SonicWall solutions to more than 300,000 SMBs in the UAE.</p>

<p>Through this partnership, Etisalat Digital will offer its SMB customers a range of SonicWall solutions, including SonicWall TZ and NSA next-generation firewalls with the Advanced Gateway Security Suite (AGSS) subscription, which includes the Capture Advanced Threat Protection (ATP) sandbox service. Etisalat will also offer SMB customers firewall security services like gateway anti-spam and anti-virus capabilities, intrusion prevention, content filtering and 24x7 support to stop known and unknown cyber threats.</p>

<p><a href="http://www.tcfnewswire.net/en/company/sonicwall/news-stories/etisalat-digital-sonicwall-to-deliver-advanced-digital-security-solutions-to-smbs-in-the-uae">SonicWall will actively support Etisalat</a> in the delivery of our end-to-end digital security solutions through the SonicWall Partner Enabled Services Program, which identifies and enables SonicWall SecureFirst Channel partners that have a security-focused professional services practice.</p>

<p>SonicWall currently partners with Telefonica in Latin America to deploy our network security solutions to customers, and we continue to expand our global telco footprint with other primary telco operators in different regions.</p>

### ENDS ###

### About SonicWall:

About SonicWall

Over a 25-year history, SonicWall has been the industry's trusted security partner. From network security to access security to email security, SonicWall has continuously evolved its product portfolio, enabling organisations to innovate, accelerate and grow. With over a million security devices in almost 200 countries and territories worldwide, SonicWall customers can confidently say yes to the future.
